```php
    public function services() {
        $titlefromcontroller = 'Voici les Services fournis par N-HiTec';
        $services = ['Programmation web', 'introduction à la gestion d\'entreprise', 'des rencontres', 'du fun !'];

        return view('pages.services')->with([
            'title' => $titlefromcontroller,
            'services' => $services
        ]);
    }
```
